DETAILED ACTION

In view of the Supplemental Appeal Brief filed on 04/10/2006 PROSECUTION IS HEREBY REOPENED, as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below.

SUPERVISORY PATENT EXAMINER

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14-17 refers to a system, thereby lacking antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3628

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12 and 14-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Wharton (US 2005/0027610).

Wharton teaches a method and system for dynamically converting data between a mobile station in a wireless communication network and an origin server in a wide area network, comprising:

Claims 12 and 14-18,

sending from a mobile station a Wireless Markup Language (WML) encoded URL request for a resource; receiving said request at a gateway server and re-formatting said request into HTML format; communicating said re-formatted request to a particular resource information on the World Wide Web, and receiving the requested resource information at said gateway; parsing said received resource information and re-formatting the processed information into WML encoded message to transmit it back to said mobile station; sending a purchase request to a merchant website; sending a purchase request response, including a payment authorization request, from the merchant website to a payment authorization system; and transmitting said purchase request response to the mobile device (Figs. 1 and 4); [0009]; [0010]; [0046]; [0051]; [0053].

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
